

Antenna Anechoic Chamber Test Turntable,
Single Axis Turntable

Single Axis Test Turntable

RM-ATSA-05

Features:

- High Precision
- Small Size
- Light Weight
- Large Load

Description:

RF Miso's single-axis turntable has reasonable structure, convenient installation. They are widely used in darkroom antenna testing, radio detection and laboratory equipment.

Specifications

Parameters	Specification	Unit
Rotating Axis	Single Axis	
Rotation Range	360° continuous	
Minimum Step Size	0.1°	
Maximum Speed	360° /s	
Minimum Stable Speed	0.1° /s	
Maximum Acceleration	120° /s ²	
Angular Resolution	< 0.01°	
Absolute Positioning Accuracy	±0.1°	
Load	60	kg
Weight	<6	kg
Control Method	RS422	
Slip ring	3-way RF joint, 0~6G, 50W	
Power Supply	AC220V	
External interface	Power supply, serial port, 3-way N-KFD	
Load interface	3-way NN-KFD	
Size	φ 250*122	mm
Working Temperature	-40℃~50℃	

Note: We can customize according to your specific needs, please contact RF Miso!
